PMR or Professional Management Review does an annual national survey on Namibia to profile Namibia as a growth point and potential investment area for foreign and local developers and investors. They do the survey to measure companies, institutions, Government entities and individuals on their contribution to the economic growth and development of the country, levels of management expertise, corporate governance, competencies, brand awareness and levels of innovation.

The ratings are based on the perceptions of the respondents (corporates and senior government officials in Namibia). A total of 6 974 ratings and nominations were sourced overall in the country.

Agra's continued growth during the past 12 months; its innovation drive and its efforts to contribute as a corporate citizen towards development and sustainable use of resources make Agra a worthy winner of these awards.
