TRADING STATEMENT

In terms of best disclosure practices, Agra’s shareholders are advised that Agra’s profit after tax, basic earnings per share and headline earning per share for the year ended 31 July 2024 is expected to decrease by between 17% and 23% compared to the previous financial period.

Agra reflects on a period that was challenging in unprecedented ways, but also demonstrated the strength and resilience of both the company and the Namibian agricultural sector. The severe and ongoing drought has tested Agra’s operations, stakeholders, and the very foundation of agriculture in Namibia. Yet, through these trials, Agra has emerged not just as a survivor, but as a leader, steadfast in the commitment to support the industry and communities. Nevertheless, these external pressures have contributed to a decline in financial performance for the year.

This trading statement has not been reviewed or reported on by Agra’s auditors and shareholders are advised to exercise caution when dealing in the shares until publication of the financial results for the year ended 31 July 2024. The final results will be released on NENS on or about 25 October 2024.
